Prerequisites:

To be successful, learners who attend this course must have experience designing Web Intelligence reports and have completed SAP BusinessObjects Web Intelligence XI 3.0/3.1 Report Design

Products Covered:

SAP BusinessObjects
Web Intelligence

Previous Training: SAP

BusinessObjects Web Intelligence
XI/3.0 Report Design

Course Description

This one-day instructor-led classroom course is designed to give you the comprehensive skills needed to apply alternative query and reporting techniques when creating complex Web Intelligence documents.

After completing this course, you will be able to create combined queries and use sub-queries. You will also be able to use character and date string functions, create variables using "If" logic, and redefine calculation contexts. The course also provides an optional appendix describing how to link Web Intelligence documents using the OpenDocument URL command.

Audience

The target audience for this course is report designers who are experienced Web Intelligence users and who need to create complex Web Intelligence documents.

Topics Covered

Advanced Query Techniques

- Using combined queries
- Using sub-queries
- Creating a query based on another query
- Changing the data sources
- Using the query drill
- Using query sampling
- Understanding dimensions and details

Character and Date String Functions

- Using character string functions
- Concatenating different data types
- Using date functions

Calculation Contexts

- Understanding calculation contexts
- Redefining calculation contexts

Using If Logic

- Grouping data with If() logic
- Modifying calculation behaviour with If() logic
- Using additional report functions

Additional reporting techniques

- Using data tracking
 - Displaying data restricted by a filter or ranking
 - Using additional report functions

Linking to documents

- Linking to documents
 - Creating hyperlinks in the HTML Report panel
 - Creating hyperlinks in the Web Intelligence Rich Client and Java Report Panel
